

2. Travel Restrictions to Mars

Subject: *What You Can and Can't Do in Martian Airspace*

Traveling to Mars? Watch out for these *must-know* restrictions:

1. **No Carry-On Meteorites:**

Any rocks over 10 kg must go in checked luggage. They also count against your crater-climbing weight limit.

2. **Intergalactic Plant Quarantine:**

Earth plants are strictly banned. Martian authorities are still mad about the whole *potato incident* in 2035.

3. **Restricted Flight Paths:**

Avoid passing through the Southern Polar Ice Cap Zone—Martians claim it's "haunted" by rogue AI from abandoned colonies.

4. **No Pet Dinosaurs:**

If you're traveling with a cloned pet, leave your velociraptor at home. Martian sandworms hate competition.

Failure to follow these rules may result in ejection into space or worse—permanent Martian citizenship (no refunds!).
